## To Ease Inflation Worries, Yellen said that Biden Infrastructure Spending will be Disbursed Gradually

US Treasury Secretary Janet Yellen dismissed concerns that President Joe Biden's plans for infrastructure, jobs and families would lead to inflation, saying the spending would be gradual over a decade. "It's spread fairly evenly for eight to 10 years," said Yellen in an interview with Meet the Press NBC, as reported by Reuters. He said the Federal Reserve would monitor inflation carefully and have the tools to deal with it if necessary. "I don't believe that inflation will be a problem but if it does, we have the tools to solve it. This is a historic investment we need to make our economy productive and fair." Biden's pandemic stimulus and recovery plan amounts to about US \$ 6 trillion and will be paid in part by a series of tax increases on the wealthiest Americans, less than 1% of the population, and by raising corporate taxes.
